Solicitation State: New York

Date prepared: 2/4/2026

Index annuities issued by The United States Life Insurance Company in the City of New York (US Life).

This illustration is hypothetical and is intended solely to depict how different crediting strategies and rates can affect the annuity's contract value and contractual benefits including any optional features selected. This illustration is only valid in solicitation state. Index factors are not guaranteed and may be changed by the company prior to the date your contract is issued. Actual results may therefore be higher or lower than shown. Your guarantees will be stated in your contract. Please be sure to read the additional disclosure at the end of the illustration. This material is intended only for educational purposes to help you, with the guidance of your financial professional, make informed decisions. We are not a fiduciary and do not provide investment advice or recommendations.

THIS IS AN ILLUSTRATION ONLY. AN ILLUSTRATION IS NOT INTENDED TO PREDICT ACTUAL PERFORMANCE. INTEREST RATES, DIVIDENDS, OR VALUES THAT ARE SET FORTH IN THE ILLUSTRATION ARE NOT GUARANTEED, EXCEPT FOR THOSE ITEMS CLEARLY LABELED AS GUARANTEED.

The purchase of a fixed index annuity is not required for, and is not a term of, the provision of any banking service or activity.

Not FDIC or NCUA/NCUSIF Insured
May Lose Value • No Bank or Credit Union Guarantee **Not a Deposit • Not Insured by any Federal Government Agency**

THIS ILLUSTRATION IS NOT COMPLETE UNLESS ALL PAGES ARE INCLUDED.

US Life

By purchasing the Power Index Premier NY with Lifetime Income Builder, you can benefit from:

- **GROWTH** potential through index crediting strategies

  Access a range of strategies designed to help accumulate more assets for retirement income.

- **INCOME** that's guaranteed for life

  Take advantage of lifetime income options, such as Lifetime Income Builder. Or you can choose annuitization, a process that can convert your contract into lifetime income payments at no additional cost.

- **PROTECTION** against current taxes

  Through the power of tax deferral, you pay no current income tax on any gains until they're withdrawn.

This hypothetical illustration is provided to give you the interest crediting that could result from each of the interest crediting strategies based on the history of the related indices. Allocating money to these options does not represent an investment directly into the index. Power Index Premier NY with Lifetime Income Builder has four index interest accounts, each with a different interest crediting strategy see Understanding Your Interest Crediting Strategies. These accounts are subject to change until the contract is issued and once issued, they may be discontinued or changed with prior notice.

Fees and Charges: The Lifetime Income Builder is optional and if elected, there is no additional charge. However, your index rate caps may be lower if you choose the benefit. A withdrawal charge may be assessed if you take money from the contract during the first seven contract years. Power Index Premier NY with Lifetime Income Builder withdrawal charges decline over seven years (9-8-7-6-5-4-3%). The withdrawal charge is not assessed against any applicable 10% free withdrawal amount.

It is likely that the index will not repeat historical performance, the current declared factors will change and actual values therefore will be higher or lower than those in this illustration. However, they will never be less than the minimum guarantees set forth in your contract.

Lifetime Income Builder can provide an annual guaranteed lifetime income amount (GLIA) that can be taken in a stream of withdrawals over your lifetime. The GLIA is the maximum amount that may be withdrawn each contract year under the benefit and is determined on the date you activate income (the date of your first income withdrawal). It is calculated by multiplying the applicable income percentage on that date by greater of the contract value or the minimum accumulation value (MAV). The initial income percentage is based on your age (or the age of the younger of you and your jointly covered spouse) on the contract the issue date, and whether you elect single or joint coverage. The applicable income percentage will increase by a set percentage annually on each contract anniversary until the earlier of the activation date or the 15th anniversary of the contract issue date. Once you activate income, your GLIA will be reduced proportionally for any withdrawals in excess of the GLIA (or in excess of required minimum distributions based on this contract ("RMD") if greater). Withdrawals taken before you activate income will reduce the contract value and the MAV upon which your GLIA will be based when you decide to activate income. Please see Key Terms and Definitions for more details.

Annuities are designed for long-term retirement savings and offer tax deferral. Withdrawals of taxable amounts are subject to ordinary income tax and, if taken prior to age 59½, a 10% federal tax penalty may apply. Partial withdrawals may reduce benefits available under the contract as well as the amount available upon a full surrender. Early withdrawals may also be subject to withdrawals charges. Keep in mind, if your premium is tax-qualified (such as an IRA), an annuity provides no additional tax-deferred benefit beyond that provided by the plan. You should only use a fixed-index annuity in a tax-qualified plan if you want to benefit from features other than tax deferral. Please consult with your financial and tax advisor regarding your individual situation. Your contract may be worth more or less than the total premium if surrendered. **Guarantees are backed by the claims paying ability of the issuing insurance company.**

Please read the Owner Acknowledgement and Buyer's Guide that will be presented to you when you purchase your annuity for more detailed information not included in this hypothetical illustration.

What you should know about the indices underlying our Index Crediting Strategies

The **S&P 500® Index*** includes 500 of the leading companies in the U.S. stock market. It is widely regarded as the standard for measuring U.S. stock market performance. When allocating money to an interest crediting option that uses this index in the calculation of interest, a key consideration for the performance of the S&P 500® index (excluding dividends) is the change in the value of the Index from the beginning of the index term to its end.

The **MSCI EAFE Index*** is designed to represent the performance of large- and mid-cap securities across 21 developed markets in Europe, Australasia, Far East, excluding the US & Canada. As of September 2018, it had more than 900 constituents and covered approximately 85% of the free float-adjusted market capitalization in each country.

The **Russell 2000® Index*** is an equity index that measures the performance of the 2,000 smallest companies in the Russell 3000® Index, which is made up of 3,000 of the biggest U.S. stocks. The Russell 2000® Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not affect the performance and characteristics of the true small-cap index.

The **NASDAQ-100® Index***
An index heavily weighted in technology stocks.

*The returns for these indices do not include dividends. This means that dividends paid on the securities underlying these indices are not included in the index return for each index, and index interest therefore will not reflect the higher returns that would apply if dividends were included.

To provide a balanced range of potential outcomes, this illustration includes thefollowing hypothetical performance scenarios

Guaranteed Values (Minimum Rates)

- **Minimum rates (Page 5):** Assumes a 0% index interest rate and a Minimum Declared Interest Rate (MDIR) for the Fixed Interest Account.

Non-Guaranteed Values (Current Rates) - The benefits and values are not guaranteed

- **Specific Period (Page 6):** The figures in this illustration are based on the actual past performance of the index over the period depicted if the index has existed for the entirety of that period. If the index has not existed for the entire period, back-tested performance is used to generate the illustrated values for the remainder of the period. This is done by taking performance for a specific, prior time period (e.g., 10 years or 15 years) and then repeating that performance for the remainder of the prior time period (e.g., the entire 30 year period). Illustrations depicting a time period longer than 30 years (e.g., the Latest Annuity Date of age 95) will similarly derive back-tested performance through that process of repeating performance periods. Any money allocated to the Fixed Interest Account assumes the current Fixed Interest Account rate (Current Rate) is held constant for the period shown. In this illustration, we have not imposed any limit on the return that can be assumed for a given year.

- **Interest Crediting and Accumulation Value Details for Each Allocated Interest Crediting Strategy (Page 7):** This scenario illustrates the values associated with each individual interest crediting strategy from the specific period scenario on.

PAST PERFORMANCE IS BASED ON HYPOTHETICAL HISTORICAL AND/OR BACK-TESTED DATA AND IS NO GUARANTEE OF FUTURE RESULTS. ACTUAL INTEREST CREDITING RESULTS WILL VARY BASED ON MARKET CONDITIONS, INDEX ALLOCATIONS, AND INTEREST PAR RATES AND CAPS, AS APPLICABLE. THE VALUES IN THIS ILLUSTRATION ARE NOT GUARANTEES OF OR EVEN ESTIMATES OF THE AMOUNTS YOU CAN EXPECT FROM YOUR ANNUITY.

Assumes current rates,factors and fees at the time of illustration.

* On the 7th Contract Anniversary and every Contract Anniversary thereafter, the Contract Value or Minimum Accumulation Value, as applicable, will be set to the larger of the two values. See Key Terms and Definitions below.

Understanding Your Interest Crediting Strategy(ies)

Power Index Premier NY with Lifetime Income Builder credits interest using up to 4 index interest accounts or crediting strategies. These strategies are described below. You can re-allocate funds among the available index interest accounts on any contract anniversary. The factors used in calculating index interest are subject to change at any time up until the contract is issued. The Initial Index Rate Cap(s) can be found on the Contract Data Page and/or Rider Data Page(s) of the contract, as applicable, along with the minimum and maximum guaranteed rates and values. Thereafter index account factors will be declared annually in advance of each contract anniversary and will be guaranteed for the following contract year.

Index interest accounts are not a permanent part of the contract and may be removed due to circumstances beyond USL's control. Such circumstances include, but are not limited to, the discontinuation of an index, a change in the composition or calculation of an index, the inability to license the use of an index and the inability to hedge risks associated with these index interest accounts. Special rules govern how assets in a discontinued index interest account may be reallocated. Please see the Owner Acknowledgment and Disclosure Statement for more information.

Table for Contract with Guaranteed Living Benefit and Premium of $100,000 or More				
Strategy	Current Initial Index Rates	Guaranteed Minimum Index Rates during Withdrawal Charge Period	Guaranteed Minimum Index Rates after Withdrawal Charge Period	Allocation %
S&P Annual PTP with Rate Cap	5.50%	2.90%	2.40%	0%
S&P Annual PTP Performance-Triggered	3.90%	2.65%	2.40%	0%
MSCI EAFE Annual PTP with Rate Cap	5.75%	2.90%	2.40%	0%
Russell 2000 Annual PTP with Rate Cap	5.75%	2.90%	2.40%	100%
Nasdaq-100 Annual PTP with Rate Cap	5.75%	2.90%	2.40%	0%
Nasdaq-100 Annual PTP Performance-Triggered	3.90%	2.65%	2.40%	0%

Table for Contract with Guaranteed Living Benefit and Premium of less than $100,000				
Strategy	Current Initial Index Rates	Guaranteed Minimum Index Rates during Withdrawal Charge Period	Guaranteed Minimum Index Rates after Withdrawal Charge Period	Allocation %
S&P Annual PTP with Rate Cap	4.50%	2.90%	2.40%	0%

Understanding Your Interest Crediting Strategy(ies), continued

- **S&P Annual Point-to-Point with Rate Cap:** This option credits calculated index interest every Contract Anniversary and is based on the percent change in the S&P500 Index over the one year period ending on that day. The annual index percent change, subject to declared Index Rate Cap, is the calculated rate of index interest for that Index Term. Interest for each Index Term is not earned until the end of that Index Term (on the Contract Anniversary). The rate of interest will never be less than zero.
- **MSCI EAFE Annual Point-to-Point with Rate Cap:** This option credits calculated index interest every Contract Anniversary and is based on the percent change in the MSCI EAFE Index over the one year period ending on that day. The annual index percent change, subject to declared Index Rate Cap, is the calculated rate of index interest for that Index Term. Interest for each Index Term is not earned until the end of that Index Term (on the Contract Anniversary). The rate of interest will never be less than zero.
- **Russell 2000 Annual Point-to-Point with Rate Cap:** This option credits calculated index interest every Contract Anniversary and is based on the percent change in the Russell 2000 Index over the one year period ending on that day. The annual index percent change, subject to declared Index Rate Cap, is the calculated rate of index interest for that Index Term. Interest for each Index Term is not earned until the end of that Index Term (on the Contract Anniversary). The rate of interest will never be less than zero.
- **Nasdaq-100 Annual Point-to-Point with Rate Cap:** This option credits calculated index interest every Contract Anniversary and is based on the percent change in the Nasdaq-100 Index over the one year period ending on that day. The annual index percent change, subject to declared Index Rate Cap, is the calculated rate of index interest for that Index Term. Interest for each Index Term is not earned until the end of that Index Term (on the Contract Anniversary). The rate of interest will never be less than zero.
- **Nasdaq-100 Annual PTP Performance-Triggered:** This option credits interest every Contract Anniversary that is based on the percent change in the Nasdaq-100 Index over the one year period ending on that Contract Anniversary. The rate of interest credited will equal the Triggered Rate if the change in index value over the index term is equal to or greater than the minimum change in index value. Interest for each Index Term is not earned until the end of that Index Term. The rate of interest earned will never be less than zero.
- **S&P Annual PTP Performance-Triggered:** This option credits interest every Contract Anniversary that is based on the percent change in the S&P500® Index over the one year period ending on that Contract Anniversary. The rate of interest credited will equal the Triggered Rate if the change in index value over the index term is equal to or greater than the minimum change in index value. Interest for each Index Term is not earned until the end of that Index Term. The rate of interest earned will never be less than zero.

Key Terms and Definitions

- **Index Term:** An Index Term is the one-year period used to measure the change in the Index values for each Index Account. The initial Index Term begins on the contract issue date. Subsequent Index Terms begin on each Contract Anniversary.
- The Invesco New Economy Index is a target volatility index, which seeks to provide strong risk adjusted returns while maintaining a 12.5% volatility target. The starting point of the index allocates to a combination of exchange traded products (ETPs) targeting a ratio of 80% innovation-focused equity exposure and 20% Bitcoin exposure.
- **Index Annual Change:** represents the positive or negative change associated with the index for a given year. This change is the basis for the Interest Earned and Credited Interest rate associated with the interest crediting options illustrated.
- **Interest Earned and Credited Interest Rate:** In this report, Interest Earned on Index Accounts is the dollar amount of index interest earned and payable each year on amounts remaining in the Index Interest Account on the Contract Anniversary. It is based on the change in the index and factors used to calculate the Credited Interest Rate. Amounts in each index account on the contract anniversary are multiplied by the applicable Credited Interest Rate for that account.
- **Index Rate Cap:** The Initial Index Rate Cap is set at contract issue and is guaranteed for one year. After the first Contract Year, subsequent Index Rate Caps are declared annually at the end of each Index Term (on the contract anniversary) and are guaranteed for the following year. Generally, each Interest Crediting Strategy has a corresponding Rate Cap.
- **Minimum Index Rate Cap:** A declared Index Rate Cap cannot be set lower than the applicable Minimum Index Rate Cap stated on the Rider Data Page.

- **Contract Anniversary Value:** The contract value on the contract anniversary. In this illustration, beginning on the 7th contract anniversary, your contract anniversary value will be the greater of your Contract Value and your Minimum Accumulation Value (MAV).
  - **Contract Value:** Your premium, plus any credited index interest, and reduced by any withdrawals and applicable withdrawal charges as described in your contract.
  - **Minimum Accumulation Value (MAV):** Your premium, accumulated on a daily basis at the Guaranteed Growth Rate of 2.40%, reduced by any withdrawals and applicable withdrawal charges as described in your contract.
    - On the 7th Contract Anniversary and every Contract Anniversary thereafter, the Contract Value or the Minimum Accumulation Value, as applicable will be set to the larger of the two values. Note that at all times, the larger of the two values is used to calculate the cash surrender value, the amount applied at annuitization or the death benefit.
- **Death Benefit:** The amount payable upon death, which is the Contract Value or the Minimum Withdrawal Value, if greater.

- **Cash Surrender Value:** In this illustration, it represents what you would receive if you withdrew all your money at one time and reflects applicable withdrawal charges. This illustrated value is the greater of the Contract Value after any applicable Withdrawal Charge has been deducted, or the MAV as described above after deduction of the amount determined as applicable Withdrawal Charge percent x (MAV –Penalty Free Withdrawal Amount).
- **Withdrawal Charges:** Power Index Premier NY with Lifetime Income Builder withdrawal charges apply for the first seven contract years and decline over that period.

- **Penalty-Free Withdrawals:** After the first contract year, you may withdraw up to 10% of the contract value as of the preceding anniversary without incurring Withdrawal Charges. GLIAs and RMDs based on this contract are not subject to Withdrawal Charges.
- **Premium:** The amount paid to the company to purchase the contract.

Key Terms and Definitions Continued

- **Guaranteed Lifetime Income Amount (GLIA):** The GLIA is the maximum amount available to be withdrawn each contract year without reducing future benefits under the living benefit rider. The GLIA is calculated by multiplying the Income Percentage on the activation date by the greater of the Contract Value and the Minimum Accumulation Value (MAV). If you make a withdrawal in excess of the GLIA (or RMD, if greater) ("excess withdrawal"), your GLIA in future years will be permanently reduced in the same proportion the excess withdrawal reduces the greater of your contract value and MAV, as applicable. **If your contract value is reduced to zero as a result of an excess withdrawal, no future GLIA will be payable, and the contract and rider will terminate.** Any withdrawals taken before you activate income can also adversely impact your GLIA because they will reduce the contract value and MAV, as applicable, upon which your GLIA will be based. NOTE: Your GLIA is calculated on your activation date and the values shown assume activation on your specified assumed Income Start Date. However, the various scenarios depicted in this report also show what your GLIA would be were you to activate income earlier than the assumed Income Start Date.
  - **Initial Income Percentage:** A percentage, as shown on the Rider Data Page, that applies during the first contract year.
  - **Income Percentage:** A percentage which is adjusted upward during the Income Growth Period by any applicable Income Percentage Increase and is used to calculate the GLIA.
  - **Income Growth Period:** The time period over which annual Income Percentage Increases are added to the prior Income Percentage. This period ends on the earlier of income activation or the 15th contract anniversary.
  - **Income Percentage Increase:** A percentage, as shown on the Rider Data Page, that is guaranteed to be added to the prior Income Percentage on each Contract Anniversary until the end of the Income Growth Period.
- **Activation of the Guaranteed Lifetime Income Amount (GLIA):** The decision to begin lifetime withdrawals under the rider. Activation must be requested in writing.
- **Maturity Date:** The latest age, specified in your contract, by which if you have not already activated lifetime income under your living benefit, you must 1) begin receiving your lifetime income or either 2) surrender or 3) annuitize the contract (see Annuity Options below). If you do not select an option, we will automatically begin your lifetime income based on the values associated with your living benefit.
- **Annuity Options:** If you elect to annuitize the contract, available Annuity Options include payments for life only or life with period certain, either of which may be for single life or joint lives; a fixed period certain only; or any payment option that is mutually agreeable between you and the company.
- **Tax-qualified Plans:** Keep in mind, purchasing an annuity within a tax-qualified plan provides no additional tax-deferred benefit beyond that provided by the plan.

Additional Note on Cancellation: You may not cancel the Lifetime Income Builder guaranteed living benefit. However, keep in mind that the benefit may be automatically terminated under certain circumstances, such as when the contract is annuitized or surrendered. Other circumstances may also apply.
